

MSE releases MPS engineered replacement for the 61X with 15,000 page yield

VAN NUYS, CA - Micro Solutions Enterprises (MSE), the industry leader for Intelligently Re-Engineered™ cartridges, continues its rapid release of extended yield cartridges with the release of a 15,000 page MPS engineered 61X for the 4100 printer.

Says Luke Goldberg of the release “ despite this printers advanced age it is still a popular mover and is often placed as a refurbished printer and used in MPS fleets as a low CPP option. These trends have extended its life which prompted us to develop our MPS engineered 15,000 page option for our dealers.” As always MSE’S MPS engineered cartridges are subjected to the markets most arduous testing protocols and employ patented and proprietary technologies to ensure quality from the first page until the end of life.

MSE is the largest USA based remanufacturer and is acclaimed as one of the leading edge innovators in the marketplace. MSE has pioneered the process of “Intelligent Re-Engineering” as applied to remanufactured printer consumables which is a protocol that employs patented technologies, proprietary processes, and stringent testing methodologies all with the goal of providing the market’s best alternative to high cost OEM print consumables. MSE has multiple certifications and accreditations including ISO 9001 and 14001. Coupled with our engineering prowess MSE also prides itself on offering the highest levels of after sales support to its dealers through its consultative sales and marketing programs. MSE is a global entity with sales and distribution in Canada, Europe (UK and the Netherlands), Israel, Brazil, California, and Pennsylvania.

Contact your sales rep today to discuss this and many exciting new products.
