

MSE adopts SCS technology in CP2025 models (for CC530A-533A)

VAN NUYS, CA - Micro Solutions Enterprises (MSE), the industry leader for Intelligently Re-Engineered™ cartridges, is pleased to announce the release of the CP2025 color cartridges with MSE's groundbreaking patent pending SCS technology. First introduced to the market over 18 months ago SCS has allowed MSE dealers to enjoy unprecedented color growth as a result of the array of historical issues that the SCS and the complete host of Absolute color technologies addresses.

When initially released MSE discussed the scalable capabilities of the technology and is now deploying it in over 6 printer families which include the 4600/4700/5500/3525/4525 and now the CP2025. This technology has virtually eliminated historical issues such as backgrounding, streaking and dirty print which are associated with toner additive buildup on the PCR.

Says Luke Goldberg, SVP MSE Global of this technology " The SCS is the very definition of intelligent re engineering; it not only address aftermarket quality issues but it actually improves on OEM print performance, especially in higher speed applications such as the CP4525 and CP5520. In the case of the CP2025 we had an incredible track record of reliability before the SCS but its incumbent upon our technical team to always look for areas of continuous improvement even when the product being improved is exceptional."

MSE is set to shortly release new and existing additional models with SCS technology, call your sales rep for details.

MSE is the largest USA based remanufacturer and is acclaimed as one of the leading edge innovators in the marketplace. MSE has pioneered the process of "Intelligent Re-Engineering" as applied to remanufactured printer consumables which is a protocol that employs patented technologies, proprietary processes, and stringent testing methodologies all with the goal of providing the market's best alternative to high cost OEM print consumables. MSE has multiple certifications and accreditations including ISO 9001 and 14001. Coupled with our engineering prowess MSE also prides itself on offering the highest levels of after sales support to its dealers through its consultative sales and marketing programs. MSE is a global entity with sales and distribution in Canada, Europe (UK and the Netherlands), Israel, Brazil, California, and Pennsylvania.
